

Designer Guide

Designer Guide

The default PrestaShop install offers a neutral theme in shades of gray, enabling sellers to quickly and freely start their activity, whatever their business line.

Nearly a 1000 themes are available through the PrestaShop Addons marketplace (<http://addons.prestashop.com/en/>). They were created either by members of the PrestaShop community or the PrestaTeam, and are sold at reasonable prices – some are even free.

As a graphic designer/web developer, you too can put your themes up for sale on the PrestaShop Addons site, and earn 70% of the selling price.

Anyone with some knowledge of CSS and image manipulation can customize PrestaShop default theme. Assuming you know PHP as well, you can build a whole new theme for your shop – or for merchants who wish to use a customized theme. Thanks to a tried and tested theme system which uses the Smarty template engine (<http://www.smarty.net/>), any shop can quickly sport a theme tailored to its needs.
